

K-SERV Integration

"Building sustainable capabilities across all phases of Emergency Management in Kansas through selfless service"

K-SERV

Kansas System for the Early Registration of Volunteers

- Kansas implementation of the federal ESAR-VHP (*Emergency System for Advance Registration of Volunteer Health Professionals*) program.
- Program was established by Congress in 2002
 - *Created to support states & territories in establishing standardized volunteer registration programs for disasters & public health & medical emergencies*
- Federal ESAR-VHP is administered by the Health & Human Services (HHS)/Office of the Assistant Secretary for Preparedness & Response (ASPR).
 - *K-SERV is administrated by the Kansas Department of Health and Environment (KDHE)*

"Building sustainable capabilities across all phases of Emergency Management in Kansas through selfless service"

K-SERV

- A web-based volunteer management system.
- The **primary goal** of the system is for volunteers who register their identities, licenses, credentials, accreditations, and hospital privileges are all verified in advance of a public health and medical disaster or emergency.

"Building sustainable capabilities across all phases of Emergency Management in Kansas through selfless service"

K-SERV – Credential Levels

- The federal ESAR-VHP office as developed a system of classifying and assigning volunteers into one of four “credential levels.”
- CRMCS will utilize K-SERV and the “credential levels” as the verification source for all licensed, certified, or registered health & medical professionals.

Preparedness

About Us:

Preparedness provides leadership to protect the health of Kansans through efforts to mitigate, prepare for, respond to, and recover from disasters, infectious disease, terrorism, and mass casualty emergencies. To accomplish this mission, Preparedness is responsible for the following:

- Health and medical planning and response in Kansas
- Serves as the coordinating unit for the Emergency Support Function (ESF) #8
- Maintains the Health Alert Network (KS-HAN)
- Serves as the grantee for the Centers for Disease Control and Prevention (CDC) and Health and Human Services (HHS) health preparedness grants.

Preparedness promotes all-hazards planning, defined as planning in the absence of a specific threat for capabilities that would be required to respond to any emergency regardless of the causative factor. Preparedness prepares a variety of exercise scenarios to contribute toward planning purposes for health preparedness.

CRMCS - Home

CRMCS

Comprehensive Resource Management and Credentialing System

CRMCS stands for Comprehensive Resource Management and Credentialing System. It is a resource management and situational awareness tool that combines many systems to increase effectiveness and efficiency of emergency services. At its core, it is an intelligent accountability system that allows responders to tag, track, and report on assets during incidents or pre-planned events.

Several of the Homeland Security Regions have implemented accountability and credentialing systems in accordance with NIMS, NFPA and the State Strategic Goals for homeland security. CRMCS builds upon these systems to provide agencies nationwide the opportunity to benefit from these capabilities.

Intelligent accountability gives responders the tools to credential personnel and equipment prior to incidents or tag

Welcome to the new responders.us. You should find many helpful resources for using the CRMCS here.

We've set up a small and quick tour to show you where a few key things are.
